Evidence of Consultation with Client

Transcription: First Meeting with my brother and cousin (1/20/17):

1. Discussed the implications of my college admissions news coming out in March and what that would mean for my brother as he moved on to high school and would not necessarily receive my guidance
2. I realized that I could possibly utilize this to not only tackle my computer science IA but to leave behind all the experience and advice I could possibly offer my brother.
3. My cousin agreed that that sounded like a good idea. So I went ahead and brainstormed the success criteria with my brother.
4. Initially the focus laid on only high school, but we eventually agreed that it was necessary to include external information that normally is rarely taught to youth.

Second Meeting with my brother (1/29/17)

1. I again confirmed the initial success criteria. He offered a few new alternatives that I could possibility teach about through the website.
2. He believed that a domain and a host would make more sense to have for a full fledged website rather than relying on html files to load. Therefore, I began to look for hosts that were less expensive.

Third Meeting with my brother (2/17/17)

1. This was after finishing the initial bare minimum prototype of the index page. He agreed that a table of contents or hyperlinks were definitely required
2. He also stated it looked very old fashioned and should be updated to look much more like it matched the modernistic websites. I took that in mind and tried to implement more elements of images into the coding.

Final Meeting with my brother (3/31/17)

1. He inquired about establishing an FAQ or search engine to make it even easier and less cluttered for him to look at.
2. He also asked questions about taking a 7th class that also was a question I did not yet have the answer for, leading me to do more research and evaluation on aspects that could be changed
